WEB DEVELOPMENT PROJECTS

Team Profile Generator

https://github.com/JesusRodriguezDev/Team_Profile_Generator

Summary: An app that allows the user to type in a team member information and creates a html page showing a diagram with cards for the manager, interns and engineer.

Tools: HTML, CSS, JS, NodeJS

Cocktail Creations

https://github.com/JesusRodriguezDev/Cocktail_Creations

Summary: Cocktail Creations is a website that allows users to search for a specific drink. It will display the ingredients and instructions on how to make a drink, as well as an instructional Youtube video. Users can lookup search history and save the videos for later use.

Tools: HTML, CSS, JS

Weather Dashboard

<https://github.com/JesusRodriguezDev/Weather-Dashboard>

Summary: A weather dashboard that displays the current weather based on the city search input by the user by making use of the Open Weather Map API. The site also saves the names of previously searched cities using local storage.

Tools: HTML, CSS, JS

Employee Tracker

https://github.com/JesusRodriguezDev/Employee_Tracker

Summary: Backend app that provides an interactive interface for users to view and manage employees, their roles and departments.

Tool: NodeJS, MySQL
